Commitment to achieving Net Zero

E Manton Limited is committed to achieving Net Zero emissions by 2050

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023	
Additional Details relating to the Baseline Emissions calculations.	
This is the first time we have reported our carbon footprint so this calculation establishes our baseline. It is based on our financial accounting year of January-December.	
Our Baseline calculation includes:	
<ul style="list-style-type: none">• Scope 1: Direct Emissions• Scope 2: Indirect Emissions• Scope 3 Categories: 1: Purchased goods and services: 2: Capital goods: 3: Fuel and energy related activities: 5: Waste generated in operations: 6: Business travel/Hotel stays: 7: Employee commuting/Teleworking: 11: Use of sold products:	
Our Baseline deviates from the requirements under PPN 06/21 as follows:	
<ul style="list-style-type: none">• Scope 3: Category 4: Upstream transportation & distribution: is not included as delivery included in cost of materials.Scope 3: Category 9: Downstream transportation & distribution: is not included as no transportation paid for by customers.• Scope 3: Category 1: Purchased goods and services: is included as spend on construction materials + office based services. Scope 3: Category 2: Capital goods: is included as purchases of new company cars + HP laptops + iPhone. Scope 3: Category 3: Fuel and energy related activities: is included as automatically calculated, well to to tank emissions. Scope 3: Category 11: Use of sold products: is included as electricity and diesel used across sites.	
Baseline year emissions:

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 5988.9 tCO₂e by 2027. This is a reduction of 17.9 %

Progress against these targets can be seen in the chart below:
