Commitment to achieving Net Zero

E Manton Ltd is committed to achieving Net Zero emissions by 2050

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022

Additional Details relating to the Baseline Emissions calculations.

It is based on our financial accounting year of January to December.

Our Baseline calculation includes:

- Scope 1: Direct Emissions
- Scope 2: Indirect Emissions
- Scope 3 Categories: 1: Purchased goods and services: 2: Capital goods: 3: Fuel and energy related activities: 4: Upstream transportation & distribution: 5: Waste generated in operations: 6: Business travel/Hotel stays: 7: Employee commuting/Teleworking: 8: Upstream leased assets:

Our Baseline deviates from the requirements under PPN006 as follows:

- Scope 3: Category 9: Downstream transportation & distribution: is not included as no transportation paid for by customers.
- Scope 3: Category 1: Purchased goods and services: is included, Scope 3: Category 2: Capital goods: is included, Scope 3: Category 3: Fuel and energy related activities: is included, Scope 3: Category 8: Upstream leased assets: is included, to provide a more complete Scope 3 calculation.

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 1770.3 tCO₂e by 2027. This is a reduction of 17.9 %

Progress against these targets can be seen in the chart below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2022 baseline and the measures will be in effect when performing the contract. The carbon emission reduction achieved by these schemes equate to 793.3 tCO₂e, a 36.8% reduction against the 2022 baseline.

- Installed 3 EV Charger points at registered office
- Switched heavy spotlights to LED lights
- Installed PV solar panels at registered office
- Switched to 100% renewable electricity

Future Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- Replace remaining petrol and diesel company cars with EV's
- Investigate using eco-friendly site cabins
- Reduce emissions from IPS panels by moving to GRP
- Engage with top 10 suppliers by carbon emissions to get a Net Zero target in place
- Share Carbon Footprint report with employees so they can see the impact their decisions can make
